
Dr. MARTIN P. EVERTS

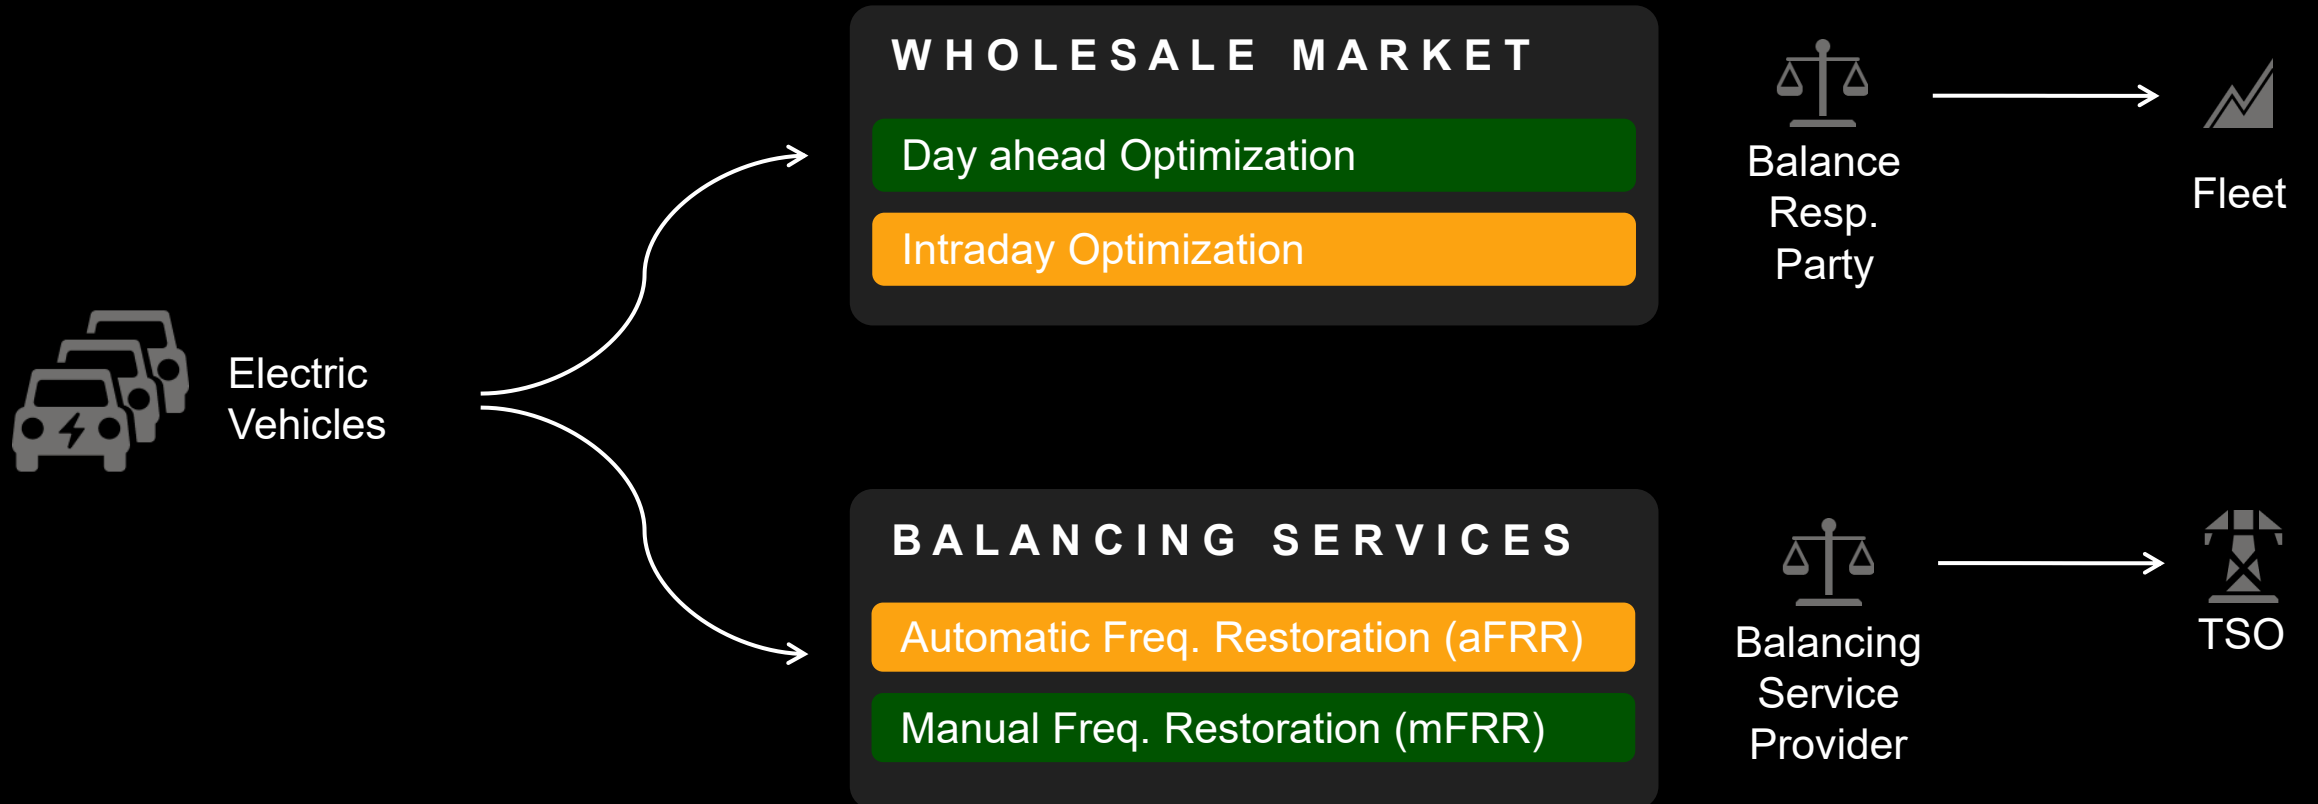

Managing Director
AMAG Energy & Mobility

Renewable energies increase energy market and grid volatility

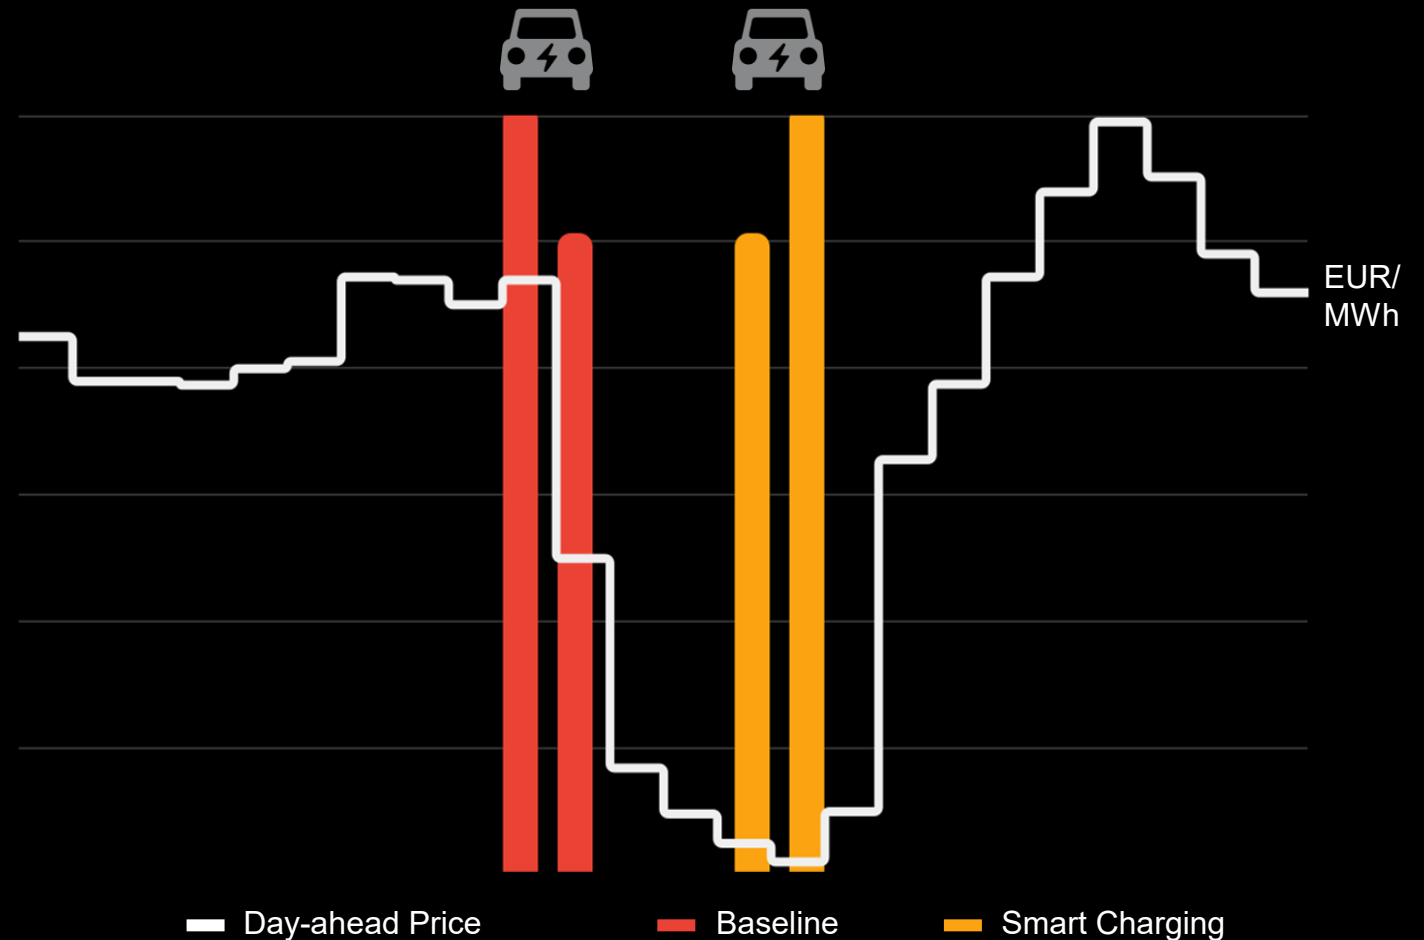

Electric vehicles will support in stabilizing energy markets and the grid

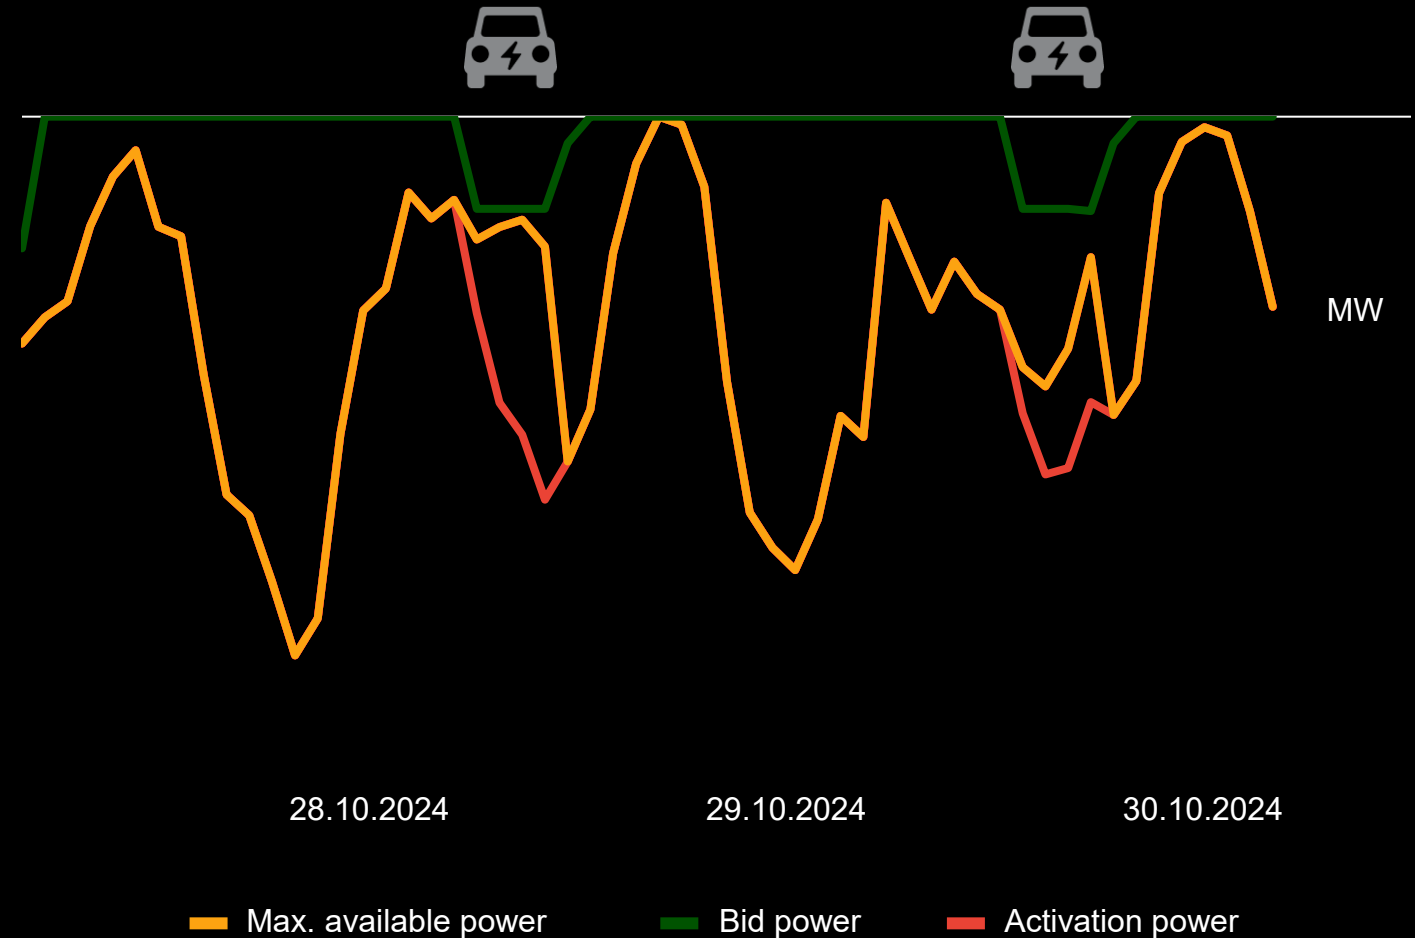

We will leverage day-ahead spot market for our fleet customers...

- Mobility needs are always prioritized
- Charging costs are minimized – independent of charging infrastructure

...and aggregate demand side flexibility for ancillary services

- Mobility needs are always prioritized
- Actuation requests for grid balancing services are disaggregated to vehicle's on-board systems

Many Thanks!
